

Tittel Hammer 01-50

Materialer furu, bjørk, syrin, berberis, lønn, valnøtt, bly, kobber, stål, messing, aluminium, asfalt, stein.

Verket består av femti hammere utformet i hovedsakelig treverk og metall. Rammene er laget av ubehandlet furu med 4mm herdet glass (990 x 490 mm, 590 x 490 mm, 340 x 490 mm).

Vedlikehold

Støv fjernes med tørr mikrofiberklut. Flekker kan fjernes fuktig klut.

Glasset vaskes på vanlig måte, men pass på at det ikke renner vann ned på trerammen.

Skulle glasset knuse kan dette byttes ved å:

Løsne rammen fra veggen ved å skru ut skruene (4 stk, T10) på topp og bunn av rammen.

Løft rammen av bakplaten.

Borr ut fire treplugger på venstre side av rammen.

Skru ut skruene (T10) innenfor pluggene.

Da vil sideplanken løsne og nytt glass kan skyves inn i rammen.
